Detailed Action

1.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 7-10, 14 and 15 rejected under 35 U.S.C. 102(e) as being anticipated by Kobori.

With respect to claim 1 Kobori teaches a multi-function machine (shown by figure 1), comprising: means 4 for merged in a first set of electronic image data (camera 1) with a second set of electronic image data (camera 27) to form merged image data; and means 10 for conveying said merged image data to one of a plurality of user selectable destinations (monitor 15 or print mech. 17) within said multi-function machine.

With respect to claim 2, Kobori teaches multi-function machine of claim 1 wherein said first set of electronic image data and said second set of electronic image data may include scanned data (image data from cameras 1 and 27).

Application/Control Number: 18

Art Unit: 2626

With respect to claim 3, Kobori teaches wherein said first set of electronic image data and said second set of electronic image data may include registered image data (photo-image and signature images are registered.

With respect to claim 7, Kobori teaches a user selectable destination which includes a printer 17, a storage means 19 and a host computer 7. Although monitor 15 is not a fax machine, 15 functions to output image data from the scanner. Claim 7 is still anticipated in view of Kobori.

With respect to claim 8, Kobori teaches a multi-function machine, comprising: means 4 for receiving a merge command; means 9 responsive to said receiving means, for reading one of the plurality of user selectable logical operations, means (switch 28) responsive to said receiving means, for accepting on eof a plurality of user selectable merge destinations within said multi-function machine; and system controller 22 responsive to the receiving means for identifying a source of a first set of digital data, computer 7 as the means responsive to said receiving means, for selecting a source of a second set of digital data; means 7 responsive to said receiving means for executing a merge operation according to said user selectable logical operation, wherein said first set of digital data is merged with said second set of digital data to form merged image data; and means 10 for transmitting said merged image data to one of said merge destinations (monitor 15, print mech. 17 or memory 18).

Application/Control Number: 10/069

Art Unit: 2626

With respect to claims 9 and 14, Kobori teaches a second set of digital data

includes cameras 1 and 27.

With respect to claim 10, ,Kobori teaches wherein said first set of electronic

image data and said second set of electronic image data include registered image data

(photo-image and signature images are registered).

With respect to claim 15, Kobori teaches a method or operating a multi-function

machine, comprising the steps of: receiving a merge command (via combiner 4)

reading data representing one of a plurality of user selectable merge destinations (via

personal computer 7) within said multi-function machine; identifying a first set of digital

image data 9photo image); selecting a second set of digital image data (handwritten

signatures) executing a merge operation wherein said first set of digital image data is

merged with said second set of digital image data to form merged image data (via

combiner 4); and transmitting (via circuit 10) said merged lamge data to one of said

merged destinations (monitor 15 or printer 17)

2.

Claims Objected

Claims 4-6, 11-13 and 16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerome Grant II whose telephone number is 703-305-4391. The examiner can normally be reached on Mon.-Fri. from 9:00 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kimberly A Williams, can be reached at 703-305-4863. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
